**Mobility/Medical
goes Additive
The VDI Student
Competition**

11-13 April 2025
in Stade,
near Hamburg

- International and interdisciplinary competition on 3D printing for students on all aspects of additive manufacturing and digitization
- Take on the challenge to solve a complex task within three days without preparation in interdisciplinary, gender-spanning teams
- Be one of the best three teams to be awarded with valuable prizes
- Apply theory and practice by solving complex problems taking technical, economic and ecological factors into account
- Focus on interdisciplinary and cross-sectorial potentials of additive manufacturing in connection with the opportunities and challenges of digitization
